

Installation Options

1. Pre-Filtration Installation - With Bypass

Protect:

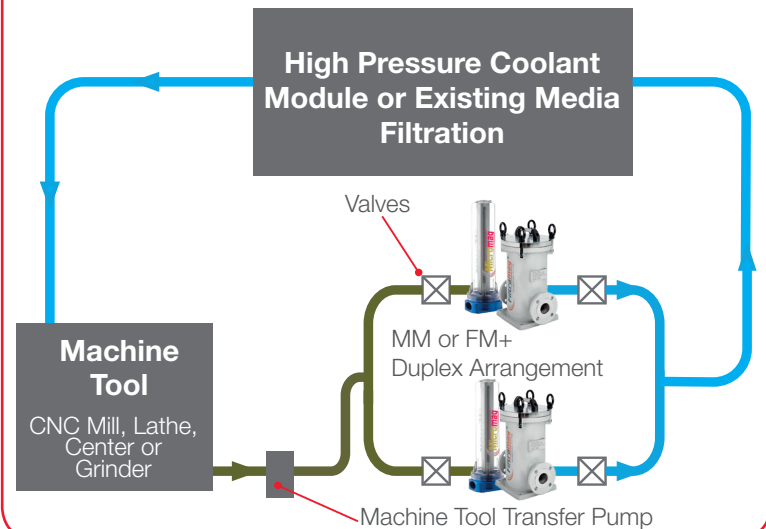

- High pressure pump
- Media filter (bags, cartridges, beds, etc)
- Machine tool: through spindle components, tooling, keep sump clean, reduce wearing of part (way covers), extend coolant/oil life with no loss of physical properties

2. Pre-Filtration Installation - Duplex

Advantages:

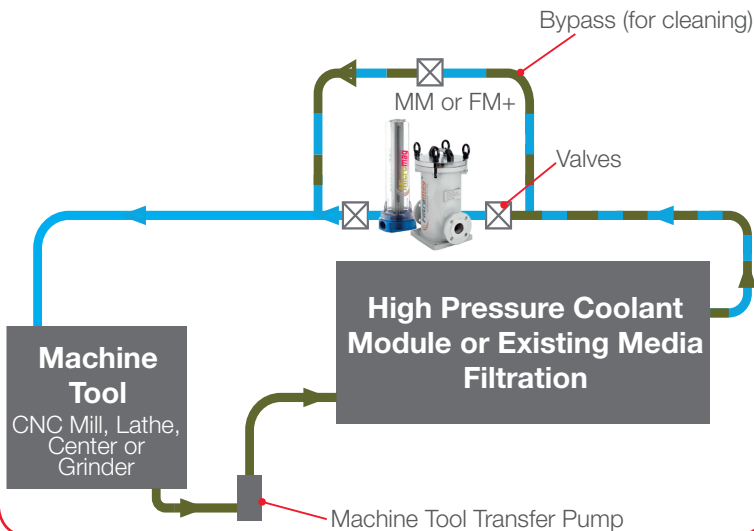

- Ease of cleaning
- Duplex magnetic filter
- Constant high efficiency filtration

3. Post Filtration Installation - With Bypass Coolant Polishing

Protect:

- Machine tool: through spindle components, tooling, extend coolant/oil life with no loss of physical properties, keep sump clean, and reduce wearing of parts (linear bearings).

4. Kidney Loop Filtration 24/7 Uninterrupted Cleaning

Protect:

- Tooling
- Keep sump clean
- General system cleanliness
- Extend coolant life (with no loss of physical properties)
